OUR JOINT FUTURE.

NEW ASSORTMENT

## MADE FROM WOOD

FSC® CERTIFIED PRODUCTS FOR  
GROWING & CULTIVATION

# Sustainability at Romberg

Taking responsibility  
for our joint future.

## Made in Germany

Many of our Romberg products are „Made in Germany“ and offer not only proven German quality, but also short transport routes and support for locally based trading partners.

## FSC® certification

In order to protect the natural environment of our forests, our wooden products and many of our packagings are FSC-certified. A symbol for responsible forest management.

## Renewable raw materials

100% peat-free and completely plantbased. CLASSIC coir pellets and Pop UP substrate are made from coconut fibre and gently compressed.

## Recycling

All indoor propagators and greenhouses are 100% recyclable and can be disposed of via the usual recycling systems and recycling centres.

## Made from Maritime Plastic

Many GREEN EDITION products are made from recycled materials from the maritime industry and find a second life in the form of horticultural and garden products.

## PEFC certification

Our CLASSIC Pots are made of biodegradable cellulose and have been awarded with the PEFC label.

## Responsibility

The majority of our production sites are located in Germany or elsewhere in Europe. This enables short distribution routes and secures local jobs. In our packaging processes we work in partnership with workshops for people with disabilities.

## Certified partners

Collaboration with certified partners based on mutual trust is an integral part of sustainable business.

A strong network enables us to combine sustainability, product quality and openness to new ideas.

We are committed to sustainable business practices and social responsibility by ensuring human rights and the environmental standards worldwide and integrate them into our supply chains. We participate in the EcoVadis assessment process to integrate sustainability practices into our operations and align ourselves with the EcoVadis sustainability criteria.

# romberg

*Dear Romberg friends,*

Products that bring a little piece of nature home to your customers, as well as sustainable thinking and action on many levels - that's what Romberg has been known for for years.

It is therefore only consequent that we are presenting a new growing collection with wood as the basic material for the coming season.

Of course, FSC-certified and from European wood cultivation. Benefit from our diverse product variations as classic shelf goods or as online goods with optimized packaging.

Made from 100% recycled plastic - our new outdoor and cultivation pots not only impress with their attractive design, well thought-out functionality and efficient packaging - they enable high harvest yields in the smallest of spaces.

The potato and plant tower and the tomato pot with flexible climbing aid offer space for the most popular cultivation classics among hobby gardeners and enrich your established cultivation range at the POS.

As further POS highlights we present fresh and variable displays in different sizes including communication material. You have the choice! Boost your sales in the future with the assembly suggestion we have selected from the top sellers - or put together your displays individually within our mix-and-match system.

We wish you and your team a successful start to the 2023/2024 growing season.

# SUSTAINABLE PRODUCTS

## REDUCING LOSS OF VALUABLE RESOURCES

A great number of discarded and obsolete fishing gears, ropes and trawls are not added to the recycling economy.

This plastic litter escapes circularity routes mainly as a consequence of poor waste management and is estimated today to be approx. 1% of the total plastic waste globally.

## LOOK AT ME – I'M GREEN

The transformation from waste to new high-quality raw material is based on modern technology.

Our Green Plastic enables circular solutions for a cleaner environment.

**Made from Maritime Plastic<sup>2</sup>**

The Green Edition of selected Romberg products stands for sustainable manufacturing from recycled maritime industry plastics and thus actively contributes to environmental protection and cleaning-up the ecosystem.

### Piketten Set Green Edition

# OUR POWER-PRODUCTS

## CLIMATIC M LED

Thanks to the addition of professional extras, this propagator is as powerful as the Maximus Complete LED but with compressed dimensions for a smaller footprint.

12094306 1

## LUMIO M LED

The perfect entry-level model for professional plant cultivation. The compact dimensions and professional LED plant lighting make for maximum cultivation success.

12094307 1

### INNOVATION

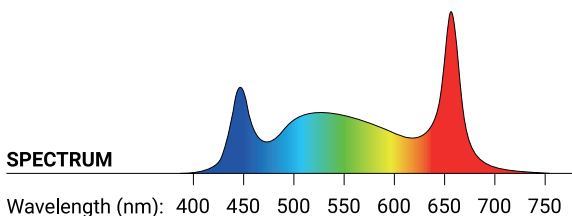

## COMPACT LED PLANT LIGHTING

Optimised wavelengths for all types of plants in indoor propagators.

- ✓ Compact LED plant lighting
- ✓ Easy assembly

- ✓ Energy-saving and long-lasting (approx. 50,000 hours)

Blue and red wavelengths increase photosynthetic performance by stimulating chlorophyll-A and B in the plant's circulatory system. This shortens the seedling phase and strengthens the plant for further growth.

5 Watt	120°	1300 Lux	IP55
PAR 200: 205 umol/s/m²	4092k	50.000 Hours	Color Neutral white

12094301 1

## MAXIMUS COMPLETE LED

Comprehensive technical equipment for maximum cultivation enjoyment. The Maximus Complete LED contains everything you need for professional plant cultivation.

16294397 1

16294396 1

## BoQUBE L PLUS LED

The innovative two-in-one planting system can be used as a propagator or as a plant box. The ceramic drainage system optimally supplies the plants with water. With the professional LED plant light (5W), particularly demanding plants can be pre-cultivated in autumn, winter or early spring.

## BoQUBE M PLUS LED

Modern design meets professional equipment. The LED plant light provides the plants with the right light spectrum, while the heating mat ensures an optimal constant temperature. Thanks to this product combination, demanding plants can be ideally pre-cultivated in autumn, winter or early spring.

# OUR CLASSIC-PRODUCTS

## WOODEN GREENHOUSES AND ACCESSORIES

Made of FSC certified pine wood and available in different variations. Ideal for gardening fans who appreciate natural materials.

### NATURE BASED

The greenhouses and planting aids are made from renewable wood sources. With appropriate care, they are very sturdy.

10093204 1

10093205 1

10093206 1

10093204 1

## OUTDOOR GROWING AND CULTIVATION POTS

Made from recycled plastic and extremely flexible in their range of usability.

### POTATO AND PLANT TOWER

Decorative and stackable individual trays with watering holes in the base. Not only potatoes, salad and herbs but also strawberries can be planted and harvested in the smallest space. Ideal for passionate balcony and terrace gardeners!

### SELF-WATERING TOMATO POT WITH FLEXIBLE CLIMBING AID

The climbing aid can be fixed at the bottom of the pot at three different points. It provides support for medium-sized and compact tomato, pepper and chilli plants. On hot summer days, a water reservoir and watering wicks provide sufficient moisture.
