PU:RE

Sustainability & Innovation

Two topics that move us.

Made in Germany

Many of our Romberg products are „Made in Germany“ and offer not only proven German quality, but also short transport routes and support for locally based trading partners.

Responsibility

The majority of our production sites are located in Germany or elsewhere in Europe. This enables short distribution routes and secures local jobs. In our packaging processes we work in partnership with workshops for people with disabilities.

Certified partners

Collaboration with certified partners based on mutual trust is an integral part of sustainable business.

A strong network enables us to combine sustainability, product quality and openness to new ideas.

PU:RE by Romberg stands for durable, resource-friendly products made from natural materials – manufactured primarily in Germany with short transport routes and transparent origins. The line deliberately avoids short-lived trends and instead focuses on genuine, truly sustainable solutions that benefit both the garden and the environment in the long term.

Renewable raw materials

100% peat-free and completely plantbased. CLASSIC coir pellets and Pop UP substrate are made from coconut fibre and gently compressed.

Recycling

All indoor propagators and greenhouses are 100% recyclable and can be disposed of via the usual recycling systems and recycling centres.

Dear Romberg friends,

When your customers stroll through your garden center or specialty store today, they are looking for more than just functional accessories – they are seeking products with soul, quality, and character. This is exactly where our mission begins: we create ranges that capture trends, speak to desires, and convince through sustainability and design. For you, this means an assortment for seed starting products that meets the needs of your target groups precisely – compelling in function, form, and sales performance.

This year, we are especially excited to introduce our new brand category **PU:RE by Romberg**. With **PU:RE**, you offer your customers a sustainable product line that combines authentic materials, honest craftsmanship, and timeless design – perfect for a conscious purchasing decision at the point of sale.

PU:RE by Romberg includes:

PU:RE Terracotta – growing essentials made from natural material, rooted in the earth, Made in Germany

PU:RE Crafted – growing essentials made from galvanized metal, handcrafted, exceptionally robust and durable

Strong sales impact at the POS: premium presentation, powerful storytelling, attractive margins

Together, let's ensure your customers find the right products for successful plant propagation – products that inspire emotionally, convince functionally, and deliver strong business results. Our portfolio provides the right answers to the questions asked at the point of sale.

We wish you a successful start to the spring season 2026 and great enjoyment in selecting your propagation assortment.

PU:RE

Crafted

PU:RE by Romberg

was born out of a deep desire to reduce the use of plastics in gardening – with the greater vision of one day completely replacing them.

Timeless. Durable. Sustainable.

Zinc combines craftsmanship with unmistakable durability – robust, long-lasting, and full of character. Our handcrafted metal products bring timeless design and maximum stability to plant propagation, made to provide lasting joy in the garden.

- Handcrafted galvanized metal
- Weatherproof & water-resistant
- For lasting indoor & outdoor use

10094404 1

This is the essence of PU:RE:

A conscious step towards materials of natural origin or those that stand out through durability and strength – without compromise when it comes to sustainability.

Natural. Simple. Authentic.

Clay is one of the oldest materials in garden culture – breathable, sustainable, and timelessly beautiful. Our terracotta products combine natural qualities with clear design and functional form, ensuring a successful start to plant life.

- Ideal for indoor and outdoor use
- Waterproof treated
- Made from natural materials
- Made in Germany

SUSTAINABLE PRODUCTS

All articles are discontinued.
Delivery while stocks last.

REDUCING LOSS OF VALUABLE RESOURCES

A great number of discarded and obsolete fishing gears, ropes and trawls are not added to the recycling economy.

This plastic litter escapes circularity routes mainly as a consequence of poor waste management and is estimated today to be approx. 1% of the total plastic waste globally.

LOOK AT ME – I'M GREEN

The transformation from waste to new high-quality raw material is based on modern technology.

Our Green Plastic enables circular solutions for a cleaner environment.

**Made from
Maritime Plastic²**

The Green Edition of selected Romberg products stands for sustainable manufacturing from recycled maritime industry plastics and thus actively contributes to environmental protection and cleaning-up the ecosystem.

GROWER LED Plant Lighting

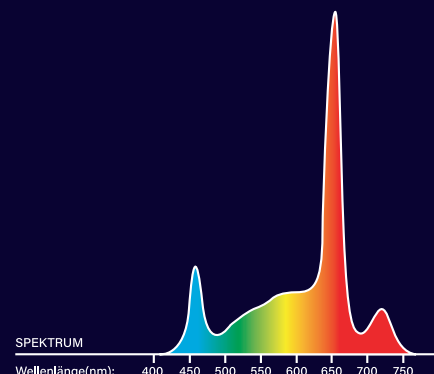

Our grow lights, developed in close collaboration with Venso EcoSolutions, are specially designed for use in our grow tents. Their full spectrum guarantees maximum growth and harvest yields.

The wavelengths of the infrared range at 700-760 nanometres particularly stimulate the flowering phase of cannabis plants.

LED Plant Lighting

70 W, 30 x 30 cm

Art.-No. 12093125

GROW TENT in 3 Sizes

- For maximum yields in minimal space - ideal for beginners and pros in indoor growing.
- Optimal use of light: The Mylar interior reflects light efficiently and promotes plant growth.
- Compact size for small setups: Perfect for tight spaces and efficient indoor growing.
- Stable and durable: The 16 mm steel frame supports up to 10 kg.
- Protection against water damage: The waterproof base provides extra security.
- Easy handling: Zippers on two sides allow comfortable and quick access to the plants.
