PRODUCT LABELS

Our product labels help you quickly navigate our product range. They highlight selected items with special sales and product benefits, making it easier for you to choose the right product.

PRICE HERO

- Strategically important price adjustment
- Exceptionally attractive value for money
- Strong driver of sales growth for retailers

TOP SELLER

- High turnover at the POS
- Proven bestsellers
- High acceptance among end consumers

MUST HAVE

- Strategic feature articles
- Trending products & marketing highlights
- Products with exceptional future potential

MORE FOCUS.
HIGHER TURNOVER.
MORE SALES.

THE FUTURE STARTS WITH THE RIGHT DECISIONS

The garden market is changing. Purchasing decisions are becoming more conscious, retail space more valuable, and competition more intense. But right now, the European single market offers enormous opportunities. Our industry has strong brands, dedicated retail partners, and millions of people who enjoy gardening. **Europe is our opportunity—a market full of potential that we can leverage even better together.**

With this in mind, we have realigned our product range to help you, our business partner, achieve greater success. We have optimized our structures, refined our product range, and focused on the products that contribute the most to sales and turnover in retail. This has led to our guiding principle for 2027: **More focus. Higher turnover. More sales.**

This realignment brings two key advantages: An optimized pricing structure creates more attractive price points and stronger purchasing incentives. At the same time, we're placing even greater emphasis on our bestsellers and fast-moving items. Because it's not the largest selection that makes a product range successful—it's the right one.

To help you quickly find your way around the catalogue, three new labels guide you through the product range: **PRICE HERO** for products with particularly attractive prices, **TOP SELLER** for proven fast-moving items, and **MUST HAVE** for products of special relevance to your assortment. This way, you can see at a glance where the greatest sales opportunities lie.

As specialists in plant propagation, we know that a successful season begins long before spring. It begins with the right decisions. So let's work together to lay the foundation for a successful 2027 gardening season.

Here's to a perfect start—and to a successful 2027 season!

PU:RE by Romberg

was born out of a desire to develop durable alternatives to conventional plastic products for plant propagation. The focus is on materials and product properties that enable long-term use.

Timeless. Sturdy. Durable.

Zinc combines traditional craftsmanship with high durability. Our handcrafted metal products bring timeless design and stability to plant cultivation - designed for many years of use in the garden.

- Handcrafted galvanized metal
- Weatherproof & water-resistant
- For lasting indoor & outdoor use

10094404 1

This is the essence of PU:RE:

Products made from selected materials that stand out for their durability, timeless design and long service life.

Clay. Simple. Authentic.

Clay is one of the oldest materials in garden culture. The material is breathable and has proven itself for centuries in plant cultivation. Our terracotta products combine these material properties with clean design and functional form - for a successful start to a plant's life.

- For indoor & outdoor use
- Waterproof treated
- Made of clay
- Made in Germany

MADE FROM RECYCLED PLASTIC

All articles are discontinued.
Delivery while stocks last.

TURNING OLD INTO NEW

The collected plastic materials are sorted, cleaned, and processed into a recycled raw material.

This raw material forms the basis for select products in the Romberg Green Edition.

REUSING MARITIME MATERIALS

Disused fishing gear, ropes, and nets from the maritime industry can be processed into raw materials for new products.

The Green Edition uses recycled plastic derived from these materials, which is then reintroduced into the material cycle.

Made from Maritime Plastic²

Selected products in the Romberg Green Edition are made with recycled plastic sourced from discarded nets, ropes, and other plastic materials from the maritime industry. This gives previously used materials a new purpose.

GROWER LED Plant Lighting

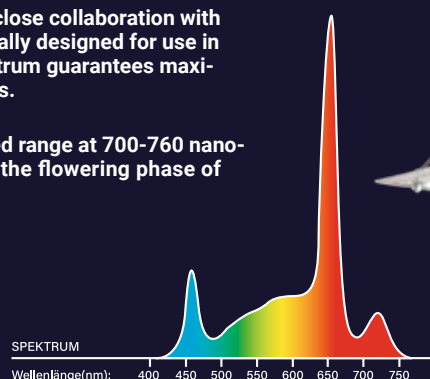

Our grow lights, developed in close collaboration with Venso EcoSolutions, are specially designed for use in our grow tents. Their full spectrum guarantees maximum growth and harvest yields.

The wavelengths of the infrared range at 700-760 nanometres particularly stimulate the flowering phase of cannabis plants.
